

HDMI active fiber optic cable

Installation instructions:

- (1) Please test the cable to ensure it works before install.
- (2) This product is directional and must be installed correctly in order to function. The transmitter side is labeled "Source" and must be plugged into the signal origination side of the circuit, typically your Blu-Ray, Set top box or HDMI switch. The receiver side is labeled "Display" and must be plugged into the signal receiver side of the circuit, typically your television or projector.
- (3) Hold the connector, not the cable, when you plug and connect the equipment.
- (4) During wiring process, don't press the cable with hard objects or cut it with sharp objects. Don't pull or tie the cable strongly
